# Automotive Acoustics Conference 2021

16 November 2021 | Digital Edition Europe/Asia

17 November 2021 | Digital Edition Americas

The international Automotive Acoustics Conference is a bi-annual global forum for the exchange of information and networking among engineers engaged in further improving the NVH characteristics of passenger cars and commercial vehicles. The principal themes of the conference explore the technological innovations as well as the market and regulatory demands that are driving the state of the art in the automotive industry. Furthermore, the conference caters to the needs of researchers and developers alike by addressing growing expectations with regard to vehicle performance and sustainability. It also touches upon the particular challenge that developments in one area of the car often also affect its acoustic characteristics - especially in the perception of the end user.

## The 6th International ATZ Conference on Vehicle Acoustics goes digital!

In 2021, the conference will take place in a reduced, virtual format and will be broadcast on two consecutive days in order to meet regional time requirements: Participants from Europe and Asia will be able to attend on the first, and participants from the Americas on the second day of the conference.
