

Powertrain and vehicle engineering under discussion in 2020

Forward-looking conferences
Dates

Welcome

ATZlive events are a firm fixture in the diaries of vehicle and powertrain engineers. In 2020, you can again look forward to a well-founded program with seven specialist conferences that will discuss current automotive trends and those of the future. In keeping with our high scientific standards, the focus will, as always, be on vehicle and powertrain technologies. At the same time, we will also discuss new and sustainable mobility, energy, and infrastructure concepts. For example, several conferences will look beyond the vehicle itself and its connectivity. At some conferences, strategic market and management issues will become increasingly important. After all, the industry and its business models are continuing to undergo radical changes. Decision-makers are now in need of more guidance than ever before.

The events organized by ATZlive make the perfect complement to the range of Springer Nature. The ATZ and MTZ media family provides engineers with reliable, up-to-the-minute technical information in print and digital form in both German and English. Springer Professional supplies top news every day, while the conferences are the ideal opportunity for in-depth discussions and for making new contacts away from everyday working life. Every conference is accompanied by an exhibition involving relevant suppliers and service providers. This gives conference participants the opportunity to find out about the latest innovations at first hand.

A scientific advisory board consisting of prominent figures from the relevant technical field helps each of our conferences with the process of planning and identifying themes for the event. This ensures that we can always offer you high-quality content about the latest topics.

We look forward to meeting you!

Dr. Alexander Heintzel
Dr. Johannes Liebl

PROGRAM 2020

Internal combustion engines and fuels // Electrified powertrains //
Complete vehicle // Chassis technologies // Vehicle acoustics //
Electric mobility // Autonomous and automated driving

ATZ MTZ

JOT

ATZ elektronik **ATZ** heavyduty **ATZ** produktion

The Powertrain of Tomorrow **SCHAEFFLER**
22.01. – 23.01.2020 | Hanau near Frankfurt a. M | Germany
14th International MTZ Conference on Future Powertrains

7th International Engine Congress
18.02. – 19.02.2020 | Baden-Baden | Germany
Complete systems and fuels for cars and commercial vehicles
Joint event organized
by ATZlive and VDI Wissensforum

Automated Driving
31.03. – 01.04.2020 | Wiesbaden | Germany
6th International ATZ Conference

chassis.tech plus
23.06. – 24.06.2020 | Munich | Germany
11th International Munich Chassis Symposium

Experten-Forum Powertrain
20.10. – 21.10.2020 | Hanau bei Frankfurt a. M. | Germany

■ **Ladungswechsel und Emissionierung** **MAHLE**
13. MTZ-Fachtagung
■ **Reibung in Antrieb und Fahrzeug** **SCHAEFFLER**
9. ATZ-Fachtagung Tribologie
■ **Simulation und Test**
22. MTZ-Fachtagung

Heavy-Duty, On- and Off-Highway Engines
10.11. – 11.11.2020 | Mannheim | Germany
15th International MTZ Conference on Heavy-Duty Engines

Electrified Mobility + Grid Integration
24.11. – 25.11.2020 | Stuttgart | Germany
3rd International ATZ Congress
Traffic concepts – Vehicle technology – Grid integration

Exhibition & Sponsoring

Take this opportunity to present your latest products and services to the specialist audience: as an exhibitor in our exclusive exhibition and/or as a sponsor with an attractive advertising presentation. Make use of this industry meeting place to make valuable contacts with customers.

Conferences in related areas:

EPS – Der Pulvertreff
13.10. – 14.10.2020 | München | Germany
39. Fachtagung Elektrostatisches Pulverbeschichten

Industrie-Lackierung
01.12. – 02.12.2020 | Stuttgart | Germany
13. Fachtagung Industrielles Nasslackieren

* Conferences shown in a grey font will be held in German.
There will be no simultaneous interpreting.

Stay at the cutting edge!

- ✓ Technical presentations from renowned speakers
- ✓ Networking in the international expert community
- ✓ Innovative products and services

The organizer

ATZlive // Spotlight on Powertrain and Vehicle Engineering

Our events are firm fixtures in the diaries of automotive engineers and engine specialists. We offer a range of innovative conferences on the latest topics in the world of vehicle engineering and engine technology, from the perspective of research, development, and applications.

Our close collaboration with the editorial teams of our specialist magazines ATZ and MTZ keeps us fully up-to-date on the latest topics and trends on the market.

Springer, with its automotive technology brands in the ATZ and MTZ Group, is part of Springer Nature, one of the world's leading publishing groups for scientific, educational, and specialist literature.
